LEVEL 1

When you refer a trader in your network, you get a default of 5% from their profit. The profit multiplies with number of people you add to your network.

LEVEL 2

When traders from Level 1 add more traders to their network, they form Level 2.

Let's say there are 5 traders in Level 1, each of them adding 2 people each to their referral. This creates a total of 10 traders in Level 2.

You have a chance of winning 2.5% profit from each of these when the trading amount of LEVEL 1 reaches 25K or more.

DISCLAIMER

Forex trading carries significant risk, and even experienced traders can incur substantial losses. Studies show a high percentage of manual traders lose their entire capital. Whether trading manually or using automation, it's crucial to understand and accept the risks involved.

At Lunar Wolf, we provide automated trading solutions (Expert Advisors or EAs) designed to improve efficiency and support strategy execution. However, our bots do not eliminate market uncertainties. Factors such as volatility, liquidity changes, execution delays, and technical issues can impact results. While our systems include risk management features, there is no guarantee of profits, and losses—including total capital loss—can occur.

Lunar Wolf acts solely as a robot provider and does not offer financial advice or brokerage services. All trading decisions and settings remain the responsibility of the user. We are not responsible for trading accounts, deposits, withdrawals, or any broker-related functions. All trades are executed automatically based on predefined parameters, which may be influenced by unpredictable market conditions. External factors, including broker issues or technical failures, may also affect performance.

We offer a referral-sharing EA, and profit-sharing levels and IB (Introducing Broker) income structures are managed internally by Lunar Wolf. All pricing plans, referral systems, and related features are subject to change at the company's discretion, in response to evolving business needs or market conditions. Our CRM platform may occasionally experience technical glitches, which will be addressed and resolved promptly. While we strive for seamless operation, users should be aware that such issues can occur and may impact access or system performance temporarily.

Users must set proper risk management levels, such as stop-loss settings, aligned with their financial capacity and risk tolerance. Lunar Wolf is not liable for any resulting financial losses. Forex trading is not suitable for everyone. Trade only with money you can afford to lose and consider seeking independent financial advice before using automated systems.
By using Lunar Wolf’s services, you acknowledge and accept these risks and take full responsibility for your trading decisions.
